

Our Successful Story

At GEOFIX, we distinguish ourselves in the global mining consultancy landscape through a unique blend of expert services and technological innovation. Our successful collaboration with PT Masmindo Dwi Area in the gold sector reflects our adeptness in managing and advancing multimillion-dollar projects, and showcases our project management skills, including geological modeling and exploration, resulting in significant resource and reserve value increases.

In the bauxite industry, our project with **PT. Mekko Metal Mining** highlights our versatility, overseeing projects from **exploration to mine production**, and emphasizing our comprehensive approach to mine management.

Underlining our unwavering commitment to innovation, our collaboration with PT Tekminera Nuestra Tierragua has yielded pioneering advancements in Machine Learning, specifically enhancing prospecting across nine key commodities, including gold, copper, nickel, and bauxite.

PT Geo Fix Indonesia proudly announces strategic partnerships with Mining One, Eramet Indonesia Mining (EIM), Longreach Mineral Exploration, and Resource ID. The collaboration with Eramet, Longreach Mineral Exploration, and Resources ID involves greenfield exploration to search for new opportunities and prospects, while the partnership with Mining One focuses on strengthening our team in mine planning and operations and PT Valenza Engineering Pty Ltd in geotechnical and hydrogeology.

Furthermore, our success in developing and implementing a specialized drilling management application, as applied by PT Minera Nusa Drillindo in a major client's project, underscores not only our ability to integrate cutting-edge technological solutions into practical mining operations but also highlights our seamless collaboration with PT Tekminera Nuestra Tierragua. This dynamic synergy of expertise and technology firmly establishes GEOFIX as a leader in the mining consultancy sector, adeptly serving both national and international mining companies.

At GEOFIX, our vision & mission statement are to empower the spectrum of mining enterprises, enabling them to unlock and elevate their operational excellence and augment the value of their assets. We are committed to fostering growth and sustainable development through a cyclical process of Explore, Discover, Develop, and Repeat. Our dedication to innovation is matched by our provision of reliable, highcaliber services and solutions, all while nurturing cutting-edge digital platforms and ecosystems specifically tailored for the mining industry. We strive to be the driving force behind our clients' continued success, ensuring they thrive in an ever-evolving market landscape.

OUR STRENGTHS

Comprehensive Service Range: GEOFIX is your all-encompassing partner from exploration to mining. As a multidisciplinary consultancy specializing in various commodities, we offer seamless and integrated solutions for the entire mining lifecycle.

Established Excellence: Our team is comprised of visionary thinkers and pragmatic doers, each with an impeccable track record. We deliver optimal solutions that have stood the test of time and brought about undeniable success for our clients.

Expertise and Diversity: GEOFIX prides itself on a team of diverse and seasoned professionals. Our commitment to excellence is unwavering, and we maintain the highest standards in all our practices to ensure the utmost quality of service.

Adherence to Best Practices: We rigorously uphold all industry codes policies, ensuring our operations are fully compliant. Our dedication to good corporate governance is integral to our business ethos. guaranteeing responsible and ethical throughout management engagements.

WHAT WE DO

Project Management

Our project management services streamline your exploration and mining projects from start to finish. We handle all aspects, from site assessment and drilling to resource estimation, permitting, and stakeholder engagement. We ensure efficient resource, budget, and timeline management while maintaining regulatory compliance and environmental responsibility.

Project Due Diligence

Our commitment to the highest industry standards ensures we **identify opportunities** and **mitigate risks effectively**, making us your trusted partner in success.

Generative and Greenfield Exploration

We provide top-tier, end-to-end exploration services focused on **identifying** and generating new project opportunities, delineating precise exploration drill targets, and pursuing the discovery of mineable ore deposits. Partner with us for unparalleled expertise in mineral exploration.

Resource and reserve estimation

Helping clients understand the full potential of their mineral assets. Using advanced techniques and industry standards, we deliver **accurate evaluations** that support decision-making for project development and investment planning, **ensuring** you **maximize** the **value** of your resources.

Mine geology and brownfield exploration

We optimize production through **expert pit mapping**, **grade control**, **and stockpile management**. Our services **enhance resource modeling**, **reconcile production**, **and identify near-mine exploration targets**.

Ore Body Knowledge

We focuses on a thorough understanding of **ore body characteristics** to support **accurate and sustainable mine planning**. This service integrates multidisciplinary data, combining geological, geophysical, geochemical, and drilling information to produce precise geological interpretations.

Metallurgy and geometallurgy

We offer expertise in metallurgy and geometallurgy to help clients **optimize ore processing and recovery**. By analyzing your resources' mineralogical and metallurgical properties, we provide tailored solutions for **efficient extraction and processing**. This approach improves recovery rates and **reduces costs**, ensuring a more profitable and sustainable operation.

Drone Lidar and Geophysics Survey

Our consultancy offers drone LiDAR and geophysics survey services to provide **precise**, **high-resolution data** for your projects. These services enhance efficiency, accuracy, and cost-effectiveness in your surveys, delivering valuable insights for better project outcomes

Big Data and Al-based target generation

Our sophisticated algorithms, developed through collaboration with expert geologists, are powered by **AI technology**, including **Machine Learning**. These algorithms adapt to data and meet the expectations of seasoned geologists in exploration target generation.

Digital exploration and mining ecosystem

At GEOFIX, our interdisciplinary team **creates advanced digital mining platforms**. We leverage geology and mining expertise to develop technology that accelerates exploration, enhances reliability, and solves problems efficiently. Our data-driven approach spans the entire mining lifecycle, shaping the future of the mining ecosystem.
